Sustainable Investment Philosophy

The Sustainable Portfolios have an objective of Sustainable Development, investing in funds that responsibly use financial and natural resources to enhance long-term human, social, environmental, and economic well-being.

At One Four Nine Portfolio Management (OFNPM) we fundamentally believe that **investors are loss averse, not risk averse**. Our investment philosophy is built around 3 principles:

- 1. Preserve Capital**
We wish to avoid the permanent loss of capital
- 2. Grow Wealth**
We measure our success by growing capital faster than the rate of inflation
- 3. Manage Risk**
We build efficient portfolios. For a given level of risk we maximise return

Each Model Portfolio aims to achieve its objectives through investment in a global multi-asset portfolio consisting of equities, bond, commercial property and other asset classes. Exposure is primarily gained through collective investment schemes (unit trusts, OEICs, investment trusts, ETFs).

You are comfortable that in **1 year out of 20** your portfolio could **fall by more than 25% in any one year**. Volatility is typically between 12% and 20% and investors should have a minimum time horizon of 5 years, ideally longer.
