### Sustainable Investment Philosophy

The Sustainable Portfolios have an objective of Sustainable Development, investing in funds that responsibly use financial and natural resources to enhance long-term human, social, environmental, and economic well-being.

At One Four Nine Portfolio Management (OFNPM) we fundamentally believe that investors are loss averse, not risk averse. Our investment philosophy is built around 3 principles:

1. Preserve Capital

We wish to avoid the permanent loss of capital

- 2. Grow Wealth
- We measure our success by growing capital faster than the rate of inflation
- 3. Manage Risk

We build efficient portfolios. For a given level of risk we maximise return

Each Model Portfolio aims to achieve its objectives through investment in a global multi-asset portfolio consisting of equities, bond, commercial property and other asset classes. Exposure is primarily gained through collective investment schemes (unit trusts, OEICS, investment trusts, FTFs)
